**EMPLOYMENT OFFER
POSITION: PRODUCTION TECHNICIAN**

PUBLISHED NOVEMBER 1st, 2018

Nüvü Camēras Inc. is a high tech company that manufactures, develops and markets scientific cameras, which are considered to be the most sensitive in the world, and this, since 2010. The end-users of these cameras are, among others, space agencies and hospital centers. The company is based in the heart of Montreal and shines on the international scene. Recognized globally as the leader in its domain, Nüvü Camēras is undergoing rapid growth and seeks to expand its dynamic and professional team.

Position Summary:

With regards to the manufacturing of our cameras, the role of the chosen candidate is to contribute to the production and quality control, in addition to maintaining the production environment. To evolve through the life cycles of an innovative company, the candidate must demonstrate priority management skills, be known for their rigour and their consistency in their manual work.

This position will require one to respect pre-established work instructions under the supervision of his immediate supervisor. The chosen candidate will be part of a passionate technical team, recognised for their expertise.

Specific Responsibilities:

- Realize the mechanical assembling of the products' cryogenic enclosures;
- Prepare work stations and equipment according to the production's needs and priorities;
- Maintain his work environment in order to meet manufacturing standards;
- Ensure the compliance of his manipulations in laboratories;
- Ensure the compliance of inputs and outputs according to predefined processes;
- Signal all observed non-conformities;
- Participate in the management of equipment inventory;
- Input production data in implanted tools;
- Participate in various continuous improvement exchanges.

Education and Experience:

College diploma in mechanical or physical engineering or any other relevant degree will be considered. A minimum of 2 years of pertinent work experience in a controlled laboratory environment; experience in a technological SME in the space, biomedical, medical or optics industry will be considered an asset.
