**EMPLOYMENT OFFER
POSITION: TECHNOLOGY PROJECT MANAGER**

PUBLISHED FEBRUARY 12, 2022

Nüvü Camēras Inc. is a high-tech company that manufactures, develops and markets ultra-sensitive low light imaging solutions for ground and space-based applications. Based on an innovation developed for space exploration, Nüvü Camēras' photon-counting imaging expertise now meets the demanding needs of many leading-edge applications such as medical and biomedical diagnostics, night vision, quantum communication and manufacturing quality control, to name a few. Since 2010, the company has put its expertise forward with its highly referenced publications, renowned international clients and innovation alliances at the cutting edge of technology and science. Recognized globally as a leader in its field, Nüvü Camēras is expanding rapidly and seeks to expand its dynamic, creative and professional team.

Position Summary:

Under the responsibility of executive management, this position will require understanding the global vision of the various company activities and challenges in order to work with all departments to plan and coordinate service and innovation projects according to the schedule of activities and priorities.

The technology project manager is a key team player and advisor to the various departments. This person must demonstrate open-mindedness, learning curiosity, autonomy and resourcefulness to rigorously and diligently assume the responsibilities. Strong management skills and a keen eye for details while also having a good overview of the situation are essential to fulfilling this position. The person sought will be part of a passionate technical team recognized for its expertise, including engineers, scientists and technicians, in addition to other highly qualified professionals.

Specific Responsibilities:

- Plan, monitor, communicate and coordinate, with assigned resources, projects to meet deadlines, costs and deliverables;
- Raise potential issues and risks to help resolve them with the assigned resources. Point out to management those that are slow to be resolved;
- Develop management tools to ensure: strong communication in a multidisciplinary team, appropriate documentation and decision-making;
- Prepare timely estimates of costs, resources and time;
- Contribute to strategic planning.

Education and Experience:

A university degree in management. (Asset: Specialization in innovation management) along with a college degree in pure sciences or the equivalent at a minimum (Asset: Graduate degree in science).

A minimum of 5 years experience in a technology SME, in service management, project management, or research and development of new complex products. Experience in the space, biomedical, or defence field is an asset.
