**EMPLOYMENT OFFER
POSITION : NETWORK ADMINISTRATOR**

PUBLISHED SEPTEMBER 18, 2023

Nüvü Camēras Inc. is a high-tech company that manufactures, develops, and markets ultra-sensitive low light imaging solutions for ground and space-based applications. Based on an innovation developed for space exploration, Nüvü Camēras' photon-counting imaging expertise now meets the demanding needs of many leading-edge applications such as medical and biomedical diagnostics, night vision, quantum computers and manufacturing quality control, to name a few. Since 2010, the company has put its expertise forward with its highly referenced publications, renowned international clients and innovation alliances at the cutting edge of technology and science. Recognized globally as a leader in its field, Nüvü Camēras is expanding rapidly and seeks to expand its dynamic, creative and professional team.

Position Summary :

In the context of IT management, the role of the new resource is to ensure the development, and maintenance of IT tools and to address occasional challenges related to equipment and software. Under the supervision of senior management, the resource will manage the computer network with a focus on efficiency: minimizing downtime, reducing costs, and enhancing security in a constantly evolving company. In addition to leveraging their skills and passion for solving IT challenges, the selected candidate will join a multidisciplinary team of engineers, scientists, technicians, and professionals, complementing the team with their advanced knowledge in information technology.

Specific Responsibilities :

- Providing technical support to users ;
- Analyzing, diagnosing, and resolving a wide range of complex challenges related to software, hardware, and peripherals;
- Conducting preventive maintenance, updating systems, and managing users;
- Administering various network, hardware, and software components;
- Understanding networking protocols and technologies to configure networks and address connectivity issues;
- Ensuring IT security.

Skills and Desired Qualities :

- Autonomous, curious, and highly adaptable;
- Ability to work on multiple challenges at once ;
- Experience in network management ;

every photon counts
