Experience with IPv4, IPv6, OpenWRT, QOS, OpenVPN;

Expertise with data protection solutions.

Then, this linux system developer position may interest you.

Position Summary:

Under the supervision of senior R&D management, the candidate will work in a multidisciplinary team of engineers, scientists, technicians, and professionals. Responsibilities include designing, implementing, and maintaining internal systems and infrastructures primarily based on Linux. In a dynamic company, the role of the candidate would be to administer Linux networks, troubleshoot and optimize performance of tailor-made IT equipment, ensuring the reliability, scalability and security of servers and workstations.

Additionally, they will participate in system development activities (DevOps). In addition to their talents and passion for Linux development, the successful candidate must have a concern for efficiency, cost reduction and strengthening security in the implementation of their solutions.

Specific Responsibilities:

Design, implement and administer Linux operating systems;

Ensure monitoring, maintenance and troubleshooting of Linux servers;

Manage updates, security fix and system configurations;

Collaborate on development to support Linux-based applications and services;

Contribute to implement security policies to guarantee data protection;

Develop and update technical documentation;

Provide, if necessary, technical support to users;

Analyze, diagnose and resolve a wide variety of complex challenges involving: software, hardware and peripherals;

Execute:

Preventative maintenance,

System updates,

And user management;

Administer the various network, hardware and software components;

Understand networking protocols and technologies, to be able to configure networks and resolve connectivity issues;

Ensure IT security.

Terms:

Full-time, permanent position with a flexible daytime schedule from Monday to Friday at approximately 37.5 hours per week;

Fixed salary depending on profile;

Competitive group insurance;

Innovative eco-responsible environment with qualified and passionate colleagues;

Strategic location at the junction of Griffintown, the Old port and Downtown Montreal neighborhoods, offering easy access for bicycles (bike path and shower available) and pedestrians, with proximity to all types of public transit (subway, bus, train, REM, Bixi);

Access to ETS privileges such as sport center, cafeteria, parking, discount at local restaurants and stores, etc.

Memorable social activities.
