Ability to work on several challenges at the same time;

Knowledge of the DevOps approach;

Active listening, teaching skills and analytical thinking;

Then, this computer systems developer position may interest you!

Position summary :

The role of the new employee will be to contribute to the design, implementation, and maintenance of internal systems and their infrastructure, which is primarily based on Linux. At a company that operates in accordance with AS9100 and cybersecurity certifications, the ideal candidate will be responsible for administering a Linux network, troubleshooting and optimizing the performance of the IT infrastructure to ensure the reliability, scalability, and security of servers and workstations, and participating in system development activities (DevOps).

In addition to leveraging their skills and passion for Linux development, the successful candidate must be committed to efficiency, cost reduction, and enhanced security when implementing their solutions.

Specific responsibilities :

- Design, implement and administer Linux operating systems;
- Ensure monitoring, maintenance and troubleshooting of Linux servers;
- Manage updates, security fix and system configurations;
- Collaborate on development to support Linux-based applications and services;
- Contribute to implementing security policies to guarantee data protection;
- Develop and update technical documentation;
- Provide, if necessary, technical support to users;
- Analyze, diagnose and resolve a wide variety of complex challenges involving software, hardware and peripherals;
- Execute preventative maintenance, system updates and user management;
- Administer the various network, hardware and software components;
- Understand networking protocols and technologies, to be able to configure networks and resolve connectivity issues;
- Ensure IT security.

Preferred Experience :

Candidates with relevant experience will be considered.

Terms:

Full-time permanent position with a flexible daytime schedule Monday through Friday, approximately 37.5 hours per week;

Fixed salary based on profile

Competitive group insurance plans;

An innovative, eco-friendly work environment with skilled and passionate colleagues;

Strategically located at the intersection of the Griffintown, Old Port, and Downtown Montreal neighborhoods, offering amenities for cyclists (bike path and showers available) and pedestrians, with easy access to all types of public transportation (metro, bus, train, REM, Bixi);

Access to ETS privileges such as sport center, cafeteria, parking, discount at local restaurants and stores, etc.

Memorable social events.

If this position interests you, please send your Curriculum Vitae and letter of intent to careers@nuvucameras.com.

We ask that candidates withhold from calling, as the numerous applications received do not allow us to respond to everyone.

We thank you for your interest and will contact you if your application is successful.
